

# Joe & Leigh's GOLF PERFORMANCE CENTER CLUB FITTING MENU

## EASY FITTINGS

The first step of an EASY FITTING begins with a dialogue between yourself and Joe & Leigh's Staff. The exchange of information and feedback which takes place during this consultation will help you zero in on a few products, test them, and identify the one you prefer.

From there, a Joe & Leigh's Certified Fitter will employ their expertise and the most current fitting tools to ensure the clubs you choose are correctly fit to your exact needs.

### EASY Iron Fitting

#### FITTING INCLUDES:

- Length of Club
- Lie Angle
- Shaft Material, Flex and Weight
- Grip Selection, Composition & Size
- Ideal Set Make-Up (i.e hybrid/iron mix)

Enjoy. Improve.

## LOOKING FOR A "HERO" FIT? YOU'RE IN GOOD COMPANY

GOLF DIGEST SENT A FAMOUS WRITER HERE  
AND HE PICKED UP 44 YARDS ON HIS DRIVE.

### Golf Digest's Visit to Joe & Leigh's Golf Performance Center

You may have seen the recent Equipment Issue of Golf Digest (and if you haven't, you can ask to see the shop copy!). It tells a great story of sports writer Steve Rushin and equipment expert, Mike Stachura's visit to Joe & Leigh's Golf Performance Center in search of more distance through custom fitting. **Spoiler Alert:** They found it here! After undergoing a Performance Fitting session, the initially skeptical writer gained a whopping 44 yards on his drive and became a believer in the benefits of expert fitting.

### The Importance of Fitting for Golfers of All Skill Levels.

It is impossible to overstate the importance of expert custom fitting. Having golf clubs that are properly fit to your unique specifications is the key to optimizing your performance on the course, and maximizing the benefits of the game-improvement technology engineered into today's golf clubs. The verdict is in. Custom fitting is no longer "optional" it's become an "essential" for all golfers, from high handicappers to scratch players.

### What Will it Do for Your Level of Play and Enjoyment?

Steve Rushin's 44 yard gain may not be typical, but it's certainly not out of reach! Custom fitting consistently yields dramatic increase in distance in drivers (an average of 17 plus yards) and irons, along with greatly improved performance and control in all the clubs throughout your bag.

And then there's the intangible (but very real) benefit that comes from knowing your clubs are optimized for your game...greater confidence that you'll go out there and play your best.

This issue of golf digest has the full story of writer Steve Rushin's visit to Joe & Leigh's Golf Performance Center. If you'd like to read the story, just ask a staff member for the shop copy.
